

**16.** The wireless controller according to claim **1**, wherein the main body further comprises a sensor configured to detect information around the wireless controller.

**17.** The wireless controller according to claim **16**, wherein the sensor comprises at least one of a temperature sensor, a humidity sensor, a dust sensor, a gas sensor, and an luminance sensor.

**18.** The wireless controller according to claim **16**, wherein the control unit generates the control signal for controlling the object to be controlled based on information detected in the sensor.

**19.** The wireless controller according to claim **1**, wherein the main body further comprises a main body display unit configured to display an image corresponding to the voice recognized in the voice recognition unit.

**20.** The wireless controller according to claim **19**, wherein the main body display unit displays an image indicating whether the control of the external device in accordance with the voice has been performed or a result of the performing of the control of the external device.

**21.** The wireless controller according to claim **19**, wherein the main body display unit displays an image indicating compliance with the command in accordance with the voice recognized in the voice recognition unit.

**22.** The wireless controller according to claim **19**, wherein the main body display unit displays an image indicating non-compliance with the command in accordance with the voice recognized in the voice recognition unit.

**23.** The wireless controller according to claim **1**, wherein the main body further comprises an extension terminal provided to connect the main body with an external device.
